

## ACRYLATE PAINT FOR HORIZONTAL ROAD MARKING

# NORMAL

### DESIGNATION AND PROPERTIES:

- It is designed for roads and highways marking for normal traffic conditions, air planes tracks, parking areas, kindergartens and sports areas with asphalt and concrete pavement.
- Perfect operational properties.
- Good durability.
- Good elasticity.
- High cohesion coefficient.
- In compliance with EN 1871:2004.

### TECHNICAL PARAMETERS:

INDEXES	NORMS
Flowing time, funnel 6 mm, (23±0,5)°C: {EN ISO 2431}	min 90 s
Density, (23±0,5)°C: {EN ISO 2811-1}	min 1,67 kg/L
Non-volatile substances content (105-110)°C/1h/2g: {EN ISO 3251}	min 78 %
Complete drying time, (23±2)°C, In dry film thickness 45 - 60 µm: {EN 29117}	max 30 min
Sand abrasion to the film, in dry film thickness 60 µm {BSS 14120-77}	0,76 kg/µm
Consumption:	0,450-0,550 kg/m <sup>2</sup> in dry film thickness 250 µm.
Packaging:	Metal packaging in net weight: 25/30 kg
